Summary

Results-driven Data Analyst with 4+ years of experience, specializing in data analysis, visualization, and business intelligence solutions. Skilled in transforming raw data into actionable insights using SQL, Python, and Power BI. Strong expertise in exploratory data analysis (EDA), dashboard development, and data-driven decision-making to improve business performance.

Skills

- Data Analysis & Interpretation
- Data Cleaning & Wrangling
- Exploratory Data Analysis (EDA)
- Data Visualization
- Dashboard Development
- Problem Solving & Decision Making
- Languages & Tools: SQL, Python
- Libraries: Pandas, NumPy, Matplotlib
- Visualization Tools: Power BI, Excel
- Other Skills: Data Modeling, Reporting, KPI Tracking

Experience

November 2022 to
Current

IBM

Data Analyst

- Analyzed large datasets to identify trends, patterns, and actionable insights, improving reporting efficiency by 25%.
- Designed and developed interactive dashboards using Power BI for business stakeholders.
- Performed data cleaning and transformation using Python (Pandas, NumPy) and SQL queries.
- Collaborated with cross-functional teams to define KPIs and business metrics.
- Automated recurring reports, reducing manual effort by 30%.
- Conducted exploratory data analysis (EDA) to support strategic decision-making.

Mar 2022 to
Oct 2022

TCS

Assistant System Engineer Trainee

Projects

1. Sales Performance Dashboard

Tools: Power BI, SQL, Excel

Roles & Responsibilities:

- Built an interactive Power BI dashboard to track sales KPIs and revenue trends.
- Extracted and transformed data from SQL databases.
- Created data models and relationships for efficient reporting.
- Delivered insights that improved regional sales performance by 15%.

2. Customer Churn Analysis

Tools: Python, Pandas, Matplotlib, SQL

Roles & Responsibilities:

- Performed EDA to identify key factors contributing to customer churn.
- Cleaned and preprocessed large datasets using Python.
- Visualized churn patterns and customer behavior trends.
- Provided actionable recommendations that reduced churn rate by 10%.

3. Financial Data Analysis & Forecasting

Tools: Excel, Python, Power BI

Roles & Responsibilities:

- Analyzed financial datasets to identify trends and forecast future performance.
- Developed forecasting models using historical data.
- Created executive dashboards for financial reporting.
- Improved financial planning accuracy by 20%.

Education

MGM Jawaharlal Nehru engineering college

Bachelor of Technology (B.Tech)
